

# Multi-release JARs

---

- Allows loading different `.class` files for different Java versions

## Multi-release JARs: Example

---

```
$ jar tf a-multi-release.jar
```

```
fruit/Apple.class
```

```
fruit/Banana.class
```

```
fruit/Pear.class
```

```
META-INF/MANIFEST.MF    ← contains 'Multi-Release: true'
```

```
META-INF/versions/9/fruit/Banana.class
```
