

Modules: What?

- Named modules as groupings of packages
- Defines what packages are exposed
- Defines other modules as dependencies
- JAR with a top-level `module-info.class`
- Opt-in, opt-out puts you in the `UNNAMED` module

Modules: module-info.java

```
module org.tcrawlley.fruit {  
    requires java.sql;  
    requires com.example.plants;  
    exports org.tcrawlley.apple;  
    exports org.tcrawlley.banana;  
}
```
